

ALUMINUM SOFFIT, FASCIA & SIDING

GENTEK®

GENTEK BUILDING PRODUCTS

GREAT CHOICES TO SUIT ALL YOUR NEEDS

Featuring a unique V-design for extra strength and rigidity, Gentek soffit panels are available in your choice of vented or plain style panels that lock together easily for a fast professional finish. Partnered with smooth or ribbed fascia board, your home will be protected in style for years to come.

SOFFIT & FASCIA ELIMINATES TIRESOME PAINTING & MAINTENANCE

Replacing your existing soffit and fascia with Gentek solid aluminum is a smart investment. Not only will it improve the ventilation under your home's eaves but it will also eliminate the upkeep involved with traditional soffit and fascia. Installation is a one-time job so, once done, you will never have to think about it again! This means no more painting because the aluminum's durable baked-on finish won't blister, flake or peel. You can also forget about the maintenance and repairs associated with wood because, unlike wood, it can't split, warp or rot.

ENHANCE THE BEAUTY OF YOUR HOME AND MAXIMIZE PROTECTION

In addition to their maintenance-free, long-lasting good looks, Gentek aluminum soffit and fascia work hard to protect your home. They not only protect the underlying eave structure from weather's extremes outside, but vented soffit also promotes proper air circulation inside in the attic. This in turn reduces heat, moisture and condensation build-up, thus cutting the risk of rot damage and making for more efficient air conditioning in summer - and less chance of ice damage in winter. Beauty and protection: now that's value, for today and the future!

THE BENEFITS OF AIR CIRCULATION

Condensation on wood can lead to interior rot; circulating air helps moisture and excess heat to escape.

Icicles and ice dams can damage eaves and rainware; proper ventilation reduces ice formation.

COLOUR CLEAR THROUGH®

Perfection? It's never too much to ask. Our Colour Clear Through system makes it easy to find the perfect colour match for your exterior design. This exclusive selection of customer-preferred colours ensures that all Gentek products – siding, soffit, fascia, trim and rainware – will beautifully match throughout our vinyl, aluminum and steel product lines.

WHATEVER YOUR COLOUR NEEDS, WE HAVE A PALETTE OF COLOURS AND MATERIALS FOR YOU

Colours may not be exactly as shown due to lithographic process.

ENVIRONMENTALLY FRIENDLY

Did you know that all Gentek aluminum siding products are produced from material that is at least 90% recycled aluminum? At the end of its long useful life, aluminum siding is 100% recyclable and can be recycled back into similar products with no loss of quality. Using recycled aluminum instead of raw materials also reduces the generation of air pollution such as carbon dioxide (CO₂), sulfur dioxide (SO₂) and nitrous oxide by 95% and water pollution by 97%.^{*} Eco-friendly aluminum siding further helps the environment because it never needs to be repainted, thereby reducing the amount of paint and other maintenance-related substances from entering the waste stream.

SIDING WITH QUALITY YOU CAN MEASURE IN EVERY DETAIL

When you improve your home with Gentek aluminum siding, you're siding with Canada's leader, giving you the assurance of a premium-quality, long-lasting exterior with proven performance.

It has the look and feel of wood without the maintenance. An occasional rinsing with the hose is all it takes to keep Gentek siding looking as good as it did the day it was installed. Now doesn't that sound better than painting every five to seven years?

THE RIGHT PROFILE FOR YOUR HOME

Each profile is available in a classic smooth finish or a "Woodgrain 2000" textured finish developed to recreate the authentic look of wood.
